## Development of Business of the Oberbank Group in Q1 2021

#### Dear Readers, Dear Shareholders,

#### The financial year 2021 started out well for Oberbank

In business operations with customers, Oberbank started the year 2021 with sustained robust demand for loans and lively business in private banking, The volume of loans rose 5.1% to EUR 17.8 billion, and primary funds increased 6.8%, rising to EUR 16.2 billion. At the same time, the factors that had had a negative impact on results in the first quarter of the preceding year were now contributing positively to earnings in the first quarter. The contribution to earnings from voestalpine and end of the impairments due to market distortions triggered by the coronavirus pandemic in the preceding year were supportive of the satisfactory result.

#### Strong growth among many industrial customers

Customer business was boosted by the strong demand for investment finance. The government's new investment allowance scheme also helped motivate companies to make investments or even increase investment activity or advance plans despite the coronavirus crisis. But also since the close of the application period at the end of February, we have been seeing lively investment in capital goods especially by industrial companies. In private banking, our customers continued to invest actively.

Net interest income was EUR 82.7 million in Q1 2021 and was therefore 3.8% below the preceding year's figure. Net fee and commission income rose by 5.4% to EUR 48.9 million. Income from investments accounted for by the equity method was positive again at EUR 23.4 million compared to the losses of EUR 81.7 million in the first quarter of the preceding year.

#### Satisfying trend in results for Q1

A volume of EUR 5.8 million was allocated to impairment charges which is 16% higher than in the same reporting period of the preceding year. Administrative expenses rose by EUR 2.0 million or 2.7% and the other operating expenses by around EUR 7 million as a result of the higher costs for the contribution to the Austrian the deposit insurance scheme and the European resolution fund. These include the additional costs for Commerzialbank Mattersburg of more than EUR 4 million. All of these factors helped boost quarterly results, and profit before tax for the period was EUR 59.2 million and after tax it was EUR 49.4 million.

#### Equity higher again

Equity at Oberbank increased to EUR 3.1 billion which is a new all-time record. At a common equity tier 1 capital ratio of 17.55% and a total capital ratio of 20.19%, puts Oberbank among the top performing banks of Europe. Both indicators increased by a solid 2.0% points each.

#### We expect full year earnings to develop well

Based on the expectations of a significant recovery of the economy in our markets, especially for our industrial customers, we are confident about the future of Oberbank. We are aiming for a substantial improvement over the preceding year provided measurement risk and credit risk do not deteriorate dramatically, for which there are no signs right now.

Linz, May 2021

& Franz Janes Se g

CEO Franz Gasselsberger Chairman of the Management Board

## The Oberbank share

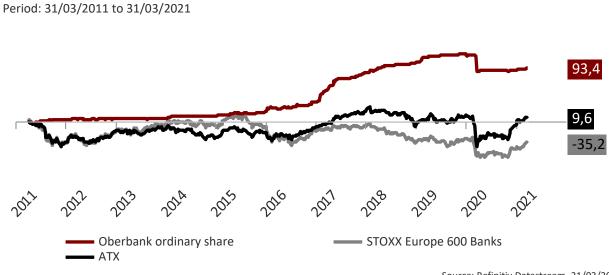

At the end of the first quarter of 2021, Oberbank's share was trading at a price of EUR 85.80. The share trend was +1.90%; including a dividend payment of EUR 0.18 per share in January 2021, the ordinary share gained +2.11%. Market capitalisation at the close of Q1 2021 was EUR 3,029.37 million as compared to EUR 2,923.93 million at the end of the preceding year.

| The Oberbank share – key figures        | Q1 2021*   | Q1 2020     |

# Oberbank ordinary share vs. ATX and the European banking index

Source: Refinitiv Datastream, 31/03/2021

This chart compares the development of the Oberbank ordinary share, the Austrian stock index ATX, and the European banking index STOXX Europe 600 Banks. The prices have been adjusted in the chart by indexing the daily closing prices of the relevant stock and the indices to 0. This means the starting prices were all set to 0% at the starting time. Therefore, the chart presents the relative percentage development.

The figures given refer to the past. These can not be used to derive future trends.

#### Earnings in Corporate and Business Banking

Profit in the Corporate and Business Banking segment was EUR 48.2 million, which is EUR 3.5 million or 7.9% higher year on year.

Net interest income rose by EUR 0.7 million or 1.0% to EUR 66.2 million.

Charges for losses on loans and advances increased from EUR 2.7 million by EUR 0.3 million to EUR 3.0 million.

Net fee and commission income was up by EUR 3.4 million or 14.8% to EUR 26.5 million over the preceding year.

Administrative expenses declined by EUR 0.6 million or 1.6% to EUR 39.9 million.

Other operating income decreased from EUR 0.6 million by EUR 0.4 million to EUR -1.0 million.

RoE in Corporate and Business Banking rose from 10.5% by 0.1%-points to 10.6%, while the cost/income ratio improved from 46.1% by 2.3%-points to 43.8%.

#### **Commercial loans**

Oberbank's commercial lending volume rose further from EUR 13,411.4 million by EUR 609.4 million or 4.5% to EUR 14,020.8 million.

| Commer             | cial loans         | YoY cha         | nge  |
|--------------------|--------------------|-----------------|------|
| As at 31/3/2021    | As at 31/3/2020    | absolute        | in % |
| € 14,020.8 million | € 13,411.4 million | € 609.4 million | 4.5% |

#### Investment and innovation finance

The number of applications submitted in Austria, Germany, Czech Republic, Hungary and Slovakia for subsidised loans and innovation projects and to secure liquidity in Q1 2021 was 625 projects, which is 12.6% higher than the very high level of the preceding year. This renewed strong rise in applications submitted was driven, on the one hand, by the coronavirus financial aid schemes, and on the other, by the largely positive bias to investment of companies in Oberbank's markets. The volume of subsidised finance granted through Oberbank amounted to EUR 1,554 billion as at 31 March 2021, which is 39.7% higher than in the same period of the preceding year.

| Investme           | nt finance        | YoY cha         | nge  |
|--------------------|-------------------|-----------------|------|
| As at 31/3/2021    | As at 31/3/2020   | absolute        | in % |
| € 10,311.4 million | € 9,687.6 million | € 623.8 million | 6.4% |

#### Leasing

After a slow fourth quarter due to the coronavirus pandemic in Q4 2020, Oberbank again posted an increase in new business of EUR 194.2 million in Q1. However, compared to the preceding year, new business declined by EUR 31.2 million.

| Leasing receivable | es from customers | YoY cha          | inge   |
|--------------------|-------------------|------------------|--------|
| As at 31/3/2021    | As at 31/3/2020   | absolute         | in %   |
| € 2,404.9 million  | € 2,452.3 million | - € 47.4 million | - 1.9% |

#### Foreign business

The global economic upswing is a direct consequence of the progress achieved in the fight against the coronavirus pandemic and the subsequent reduction of the containment measures. Therefore, the IMF expects the global economy to expand by 4.0% this year and by 5.5% in 2022. The assessment states that China, India, Vietnam, UK, Canada and also the EU will play a crucial role for economic growth in the first half-year 2021. The Euler-Hermes Group expects its insolvency index to rise by 31.0% in a comparison of 2019 with 2021. Worldwide, there are 44 countries confronted with a rising number of insolvencies. Furthermore, the temporarily closure of the Suez canal due to an accident revealed the vulnerability of international supply chains. The consequences were higher shipping costs, changes to delivery plans and the immediate rise in the price of commodities. In this situation, the advisory competence of Oberbank in international trade – especially letters of credit, documentary collection and guarantees – has proven highly valuable for securing sales and purchases.

#### **Documentary business**

These traditional hedge transactions for international trade have proven ideal as protection against the risks of global trade. International companies rely on the expertise of Oberbank for security and risk protection. Market participants showed greater risk awareness and demand for documentary transactions to hedge risks rose again. In Q1 2021, 9.4% more hedging instruments were settled than in the same period of the previous year. Volumes also increased by 9.0%. At the end of 2020, businesses were more optimistic again about entering foreign markets.

#### Export finance

In these challenging times, being able to serve as a single point of contact for advisory services for international transactions was an advantage. Apart from securing and financing foreign investments, the significance of providing support to customers for domestic investment projects for exports is increasing, and here as well, the market share widened to over 13%.

We also successfully defended our ranking as the leading Austrian regional bank for revolving OeKB lines of credit. With respect to export fund loans to SMEs, Oberbank attained a market share of 11.5% as at 31 March 2021, and of over 10.4% for loans to large corporates under the KRR procedure.

#### Factoring

There is demand for factoring as a finance alternative. The positive trend in new business acquisition and volumes continued for a sixth year in a row. This development was also seen in the renewed rise in factoring sales despite the negative market environment and in the positive feedback received from customers.

#### **Payment services**

Earnings from payment services in Corporate and Business Banking was 2.5% higher year on year. Further steps were taken in the digitization of payment services in the first quarter.

Since January, SEPA payments in Austria and Germany entered before 12:00 noon are forwarded to the recipient banks on the same day. Additionally, the progress was made in the development of CAMT.086 (electronic generation of fee statements) and it was made available to the first customers at the beginning of April. Further internal processes were also digitized. Now it is possible to conclude contracts electronically in a paperless process making it even more sustainable.

#### Structured finance

Demand was high for structured finance transactions in the first quarter of 2021. Starting out from an already high level in the preceding year, the total number of enquiries went up again by 7.0%, and the project volume of transactions processed even rose by 10.0% year on year. The strongest growth driver was again real estate lending. In this area, enquiries increased by more than 20.0%, and project volume expanded by 36.0%. In the areas of lending for tourism, change of ownership and expansion finance, we succeeded in maintaining the high levels of the preceding year both in number of transactions as well as in project volumes. We are seeing signs of heightened capital spending in the business sector and this is also reflected in the lively business in structured finance. Syndicated loans and borrowers' notes developed very positively in Q1 2021. Compared to the same period of the preceding year, the number of transactions and outstanding debt volumes were higher. Oberbank also succeeded in assuming the role of lead financier in several interesting projects. Numerous projects are already in the pipeline also for the second quarter of 2021. Business in borrowers' notes showed a moderate number of issues and high demand from investors, and for Oberbank this resulted in a substantial reduction in the allocation of subscribed transactions.

#### **Oberbank Opportunity Fund**

In the first quarter of 2021, the Oberbank Opportunity Fund received 40 enquiries which was more or less the level of the same period of the preceding year. The Oberbank Opportunity Fund completed three new transactions in this period. Since the inception of the Oberbank Opportunity Fund, 98 transactions for equity, mezzanine capital or high-yield capital were supported with funding (plus external capital loans) and ten supplementary financing projects were finalized. The volume of capital committed as at 31 March 2021 was around EUR 240 million distributed across equity, mezzanine capital and high-yield capital.

#### International network of partner banks and institutions

Oberbank's global partner bank network sustainably ensures the smooth processing of business payment transactions and documentary business for Oberbank customers.

With more than 1,100 partner banks worldwide and access to major global and European payment services platforms, we cover all business lines in the area of "Pay - Secure - Finance". The current higher demand for risk hedging and insurance among exporters is due to the instability of the markets caused by the coronavirus.

#### Primary deposits

Low interest rates and no change – this is how one could describe the situation for sight deposits even though the yield curve at the long end has shown some movement in the past three months. Interest rates increased by up to 0.3% for maturities close to 10 years or longer. This was caused by rising inflationary fears. The ECB's low interest rate policy is aggravating the negative interest situation. The bond purchasing programmes continue to pump liquidity into the market. Against this backdrop, Oberbank continues its course with respect to negative interest and partially passes on the costs incurred to corporate and business customers.

#### Currency risk management

The year started out on a positive note in currency risk management, encouraged by movements in the USD and the growing optimism regarding the economy. Customers engaged in international business used hedging in the form of forward exchange transactions. Limits on purchases and sales of foreign currencies were also used frequently. Generally, it became clear that with the improving containment of the coronavirus crisis, international business will also revive and gain importance. Income from the foreign exchange business increased year on year.

# **Personal Banking**

# Earnings in Personal Banking

Profit in the Personal Banking segment was EUR 14.0 million, which is EUR 2.9 million or -17.3% lower year on year. Net interest income decreased by EUR 0.6 million or 4.0% to EUR 15.3 million.

Charges for losses on loans and advances decreased by EUR 0.4 million to EUR 0.6 million.

Net commission income declined from EUR 0.9 million or 3.9% to EUR 22.4 million, which was lower year on year.

Administrative expenses increased by EUR 2.0 million or 8.8% to EUR 24.3 million.

Other operating income increased by EUR 0.2 million or 22.3% to EUR 1.3 million.

Return on equity in Personal Banking declined from 22.1% by 5.4%-points to 16.7%, and the cost/income ratio deteriorated from 55.6% by 6.9%-points to 62.5%.

#### Personal accounts

The portfolio of personal accounts expanded year on year by 1,164 to a total of 191,434 accounts. We are constantly enlarging our range of personal accounts by adding innovative products and payment services functions. Digital and mobile solutions such as the Oberbank customer portal, the Oberbank banking app, and the Oberbank wallet app complete our array of services and are very popular with customers.

| Personal        | accounts        | YoY ch   | ange |
|-----------------|-----------------|----------|------|
| As at 31/3/2021 | As at 31/3/2020 | absolute | in % |
| 191,434         | 190,270         | 1,164    | 0.6% |

#### Personal loans

The volume of personal loans rose by EUR 253.7 million or 7.2% to EUR 3,795.1 million compared to 31 March 2020, with the volume of new retail loans granted in the first quarter of 2021 declining 0.3% year on year. Encouraged by current interest rates, demand for housing loans remained high. The share of foreign currency loans in the total personal loan portfolio of Oberbank was 1.9%.

Oberbank also informs borrowers of potential funding schemes to promote sustainability and develops suitable project funding strategies together with customers.

| Person            | al loans          | YoY cha         | nge  |
|-------------------|-------------------|-----------------|------|
| As at 31/3/2021   | As at 31/3/2020   | absolute        | in % |
| € 3,795.1 million | € 3,541.4 million | € 253.7 million | 7.2% |

#### Savings deposits

The volume of savings deposits decreased by EUR 34.7 million or 1.3% to EUR 2,637.0 million compared to the preceding year. Customers continue to leave money on giro accounts and on daily callable investment forms. Online savings products continue to gain ground and have increased by EUR 30.4 million or 3.3% since the start of the year.

| Savings           | deposits          | YoY cha        | nge   |
|-------------------|-------------------|----------------|-------|
| As at 31/3/2021   | As at 31/3/2020   | absolute       | in %  |
| € 2,637.0 million | € 2,671.7 million | -€34.7 million | -1.3% |

#### Securities business

Fee and commission income from securities operations dropped by only EUR 0.4 million or -2.3% to EUR 16.8 million in Q1 2021 compared to the record year 2020 – at the time, turnover had increased steeply at the peak of the coronavirus crisis. Developments on the stock market were quite positive in the first three months of the year 2021. The expansionary policy of central banks, massive public financial aid packages and the global vaccination campaign helped boost optimism. As a result, strong markets such as the US – but also Germany – rose to new record highs. This also had a very positive impact on trading activity of customers. This was true for stock trading as well as for inflows into investment funds. Customer activity on the customer portal broke new records. New all-time highs were seen in support activity and orders placed by customers in equity trading. By contrast, demand is still very weak in the asset class of bonds on account of the still very low interest rates. Oberbank took part in the syndicated issuance of a green bond of S IMMO AG to support sustainability also through bond issues.

The development of volumes on customer custody accounts was also positive, climbing to a new record of EUR 17.7 billion.

| Commission inco | me from securities | YoY cl   | nange |

#### Market value on custody accounts

Year on year, the market value on custody accounts increased steeply by EUR 4,152.0 million or 30.6% to an all-time high of EUR 17,711.9 million.

| Market value on    | custody accounts   | YoY char          | nge   |
|--------------------|--------------------|-------------------|-------|
| As at 31/3/2021    | As at 31/3/2020    | absolute          | in %  |
| € 17,711.9 million | € 13,559.9 million | € 4,152.0 million | 30.6% |

#### **Oberbank** issues

In Q1 2021, Oberbank also placed a volume of EUR 296.4 million in bond issues. EUR 250 million thereof were placed with institutional investors. There was no new offer from 3-Banken Wohnbaubank AG.

#### 3 Banken-Generali Investment-Gesellschaft m.b.H.

3 Banken-Generali Investment-Gesellschaft m.b.H. developed better (3.2%) than the overall market in Austria in the first quarter of 2021, rising by 4.5% with respect to volumes under management. The market share of the company was 5.6% on 31 March 2021.

Oberbank's market share has grown since 31 December 2020 by EUR 313.8 million or 6.7% widening to a new record of EUR 5.002.9 million, and therefore, much better than the overall market. This increase was driven by both robust demand and rising prices.

The gain was 27.7% or EUR 1,086.8 million year on year, starting out from a relatively low level during last year's coronavirus turmoil.

Net inflow volumes into open investment funds continue at a high level, mostly into Oberbank's asset management portfolios, the three "Oberbank Premium Strategien" funds as well as into the sustainable fund "Mensch & Umwelt". There were also substantial transactions in special funds custom-designed for customers investing over EUR 10 million. Oberbank currently accounts for 45.3% of the total volume of the company, which also breaks a new record.

| Public investment fu | nds and special funds | YoY char          | nge   |
|----------------------|-----------------------|-------------------|-------|
| As at 31/3/2021      | As at 31/3/2020       | absolute          | in %  |
| € 5,002.9 million    | € 3,916.1 million     | € 1,086.8 million | 27.7% |

#### Private banking

Assets under management in private banking rose year on year by EUR 2,116.9 million or 24.0% to EUR 10,949.0 million, thus attaining a new all-time high. The increase since the start of the year has been EUR 670.0 million or 6.5%. Inflows into individual portfolio management mandates also saw an increase to a new record of EUR 706.8 million.

| As at 31/3/2021     | As at 31/3/2020        | absolute          | in %  |
| € 10,949.0 million  | € 8,832.1 million      | € 2,116.9 million | 24.0% |

#### Building society savings

In the first quarter of 2021, a number of 4,504 building society savings contracts were brokered. This corresponds to an increase of 1,539 contracts or 51.9% versus the same period of the preceding year.

#### Wüstenrot loans

A significant increase was also achieved in Wüstenrot loans. In the first quarter of 2021, a lending volume of EUR 14.5 million was brokered for Wüstenrot, which is 83.5% higher year on year.

#### Insurance business

In the insurance business, total production (life insurance and non-life insurance) rose 26.8% year on year. Almost all insurance segments posted growth rates. The most significant increases compared to the preceding year were achieved in the segments of accident insurance (82.7%), company pension schemes (75.6%) and risk insurance (70.7%).

| Insurance contract | s - premium volume | YoY cha        | nge   |

#### Earnings trend in Financial Markets

The profit in Financial Markets rose by EUR 141.1 million from negative EUR 116.7 million to positive EUR 24.4 million. Net interest income decreased by EUR 3.3 million or 72.3% to EUR 1.3 million.

Income from equity investments rose from negative EUR 81.7 million by EUR 105.1 million to positive EUR 23.4 million. Charges for losses on loans and advances increased from EUR 1.4 million by EUR 0.9 million to EUR 2.3 million.

Net trading income increased from negative EUR 2.4 million by EUR 6.5 million to positive EUR 4.1 million.

Administrative expenses were EUR 0.7 million higher year on year at EUR 2.9 million.

Other operating income increased from negative EUR 33.6 million by EUR 34.4 million to positive EUR 0.8 million. RoE in the first quarter of 2021 was 10.7%, and the cost/income ratio was 9.7%.

#### Proprietary trading

Optimism predominated on financial markets in the first quarter. Sentiment was boosted by hopes that the coronavirus pandemic will soon end. Stock markets rallied and long-term interest rates rose especially in the US dollar. Gold as a crisis currency lost some ground and the US dollar appreciated slightly. This environment was supportive for all trading segments and helped lift earnings.

#### Liquidity

Oberbank successfully placed a senior non-preferred bond with a volume of EUR 250 million on the capital market at the beginning of the year. This bond with a maturity of 8 years raised long-term capital, which also counts towards the MREL ratio.

In addition, a further EUR 450 million were raised under the ECB's targeted longer-term refinancing operations (TLTRO). This liquidity carries interest of -0.5%, and with the achievement of credit growth targets, the interest rate improves to 0.5%. Customer deposits also expanded in the first quarter by EUR 500 million. These inflows raised cash reserves further and they rose well above EUR 3 billion.

# **Own funds**

Own funds stood at EUR 3,140.4 million as at 31 March 2021, which is a ratio of 20.19%. Tier 1 capital was EUR 2,779.1 million and the tier 1 capital ratio was 17.87%. The common equity tier 1 capital of EUR 2,729.1 million corresponds to a ratio of 17.55%.

### Risk

Oberbank's risk policy takes into account the risk situation of all business areas including the new markets. Risk management focuses on keeping customer funds entrusted to Oberbank safe, conserving own funds and guaranteeing liquidity.

The most important risk category is counterparty risk. This risk is accounted for by recognizing the corresponding impairment charges in the balance sheet.

When assessing creditworthiness and in collateral policy, Oberbank can rely on decades of know-how. Moreover, its business model as a regional bank, professional credit management and a balanced distribution of overall debt across customer segments serve to contain the threat to Oberbank's overall result from this risk exposure. Therefore, it may be assumed that there will not be any extraordinary counterparty risk events in the full financial year 2021.

The other risk categories are equity risk (risk of loss in value or foregone profits in the equity portfolio), market risk (risk of losses due to fluctuating interest rates, foreign exchange rates or equity prices), operational risk and liquidity risk. These risks are also covered by the corresponding funds in line with the principle of conservatism. In the case of liquidity risk, the sound position of Oberbank is also supported by the fact that it can refinance the entire credit volume (31 March 2021: EUR 17.8 billion) with the primary deposits of customers, own issues and deposits from Förderbanken (OeKB, LfA, KfW) of EUR 19.0 billion (as at 31 March 2021). Additionally, Oberbank has a permanent risk controlling system in place as well as strict process management and other efficient control and management instruments.

| Return on equity before tax in % <sup>2)</sup>                           | 7.70             | n.a.             |
| Return on equity after tax in % <sup>3)</sup>                            | 6.43             | n.a.             |
| Risk/earnings ratio (credit risk/net interest income) in % <sup>4)</sup> | 7.02             | 5.82             |
| Earnings per share in € <sup>5)6)</sup>                                  | 1.41             | -2.09            |

1) Administrative expenses in relation to net interest income, equity method, net fee and commission income, net trading income and other operating income

2) Profit/loss for the year before tax in relation to average shareholders' equity

3) Profit/loss for the year after tax in relation to average shareholders' equity

4) Charges for losses on loans and advances in relation to net interest income

5) Profit/loss for the year after tax in relation to average number of shares in circulation

6) Since no financial instruments with diluting effect were issued, diluted earnings per share were identical with undiluted earnings per share. In the financial year 2020, the preference shares issued were converted into ordinary shares. Therefore, earnings per share as at 31 March 2021 refer only to ordinary shares. In the preceding year, earnings per share were the same for both ordinary and preference shares.

# Notes to the consolidated financial statements

#### Accounting policies

The consolidated financial statements of Oberbank AG have been prepared in accordance with the International Financial Reporting Standards (IFRS) published by the International Accounting Standards Board (IASB) as in force and as adopted by the EU and the interpretations thereof by the International Financial Reporting Interpretations Committee (IFRIC). The consolidated financial statements cover the first quarter of 2021 (1 January 2021 to 31 March 2021) and compare the results with the corresponding periods of the preceding year. This condensed interim report for the first quarter of 2021 complies with IAS 34 ("Interim Reports"). No full audit or review by an auditor has been conducted of these condensed interim financial statements for the group. We have not applied standards and interpretations that take effect as of the financial year 2022 or later.

#### Changes to accounting policies 2021

The quarterly report of Oberbank AG has been drafted using the same recognition and measurement policies as applied on 31/12/2020. An exception are the standards and interpretations that apply to financial years that start on or after 1 January 2021. Only those new standards and interpretations are presented that are relevant for the operating activities of Oberbank.

The following standards and interpretations, as amended, have been mandatory since January 2021.

• Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4, IFRS 16 – Interest rate benchmark reform (Phase 2)

The amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 are intended to ameliorate the effects on financial reporting that occur when an existing reference interest rate is replaced by an alternative interest rate. In particular, the amendments make it simpler to implement the modifications required due to the IBOR reform. Apart from this, hedge contracts on the balance sheet will be permitted to be continued under modified documentation despite the replacement of the reference interest rate. This does not result in any material effects on the consolidated financial statements of Oberbank.

#### **Actuarial assumptions**

Material actuarial assumptions for calculating the present values of defined benefit obligations did not change compared to 31 December 2020.

#### Oberbank group of consolidated companies

The group of consolidated companies as at 31 March 2021 included, apart from Oberbank AG, 29 Austrian and 17 foreign subsidiaries. Compared to 31 December 2020, the group of consolidated companies did not change.

#### Effects of the coronavirus pandemic on the consolidated quarterly financial statements

#### 1) Background

The coronavirus pandemic has dominated life for months – and still does – with curfews, closed restaurants and shops as well as production standstills causing severe, unprecedented changes to the public and private lives of people in Austria and worldwide. Hardly anyone can reliably assess the effects of this global crisis at present. Many companies are affected by collapsing sales markets despite the meanwhile eased restrictions. In many countries, numerous measures have been initiated and financial aid programmes started to support the economy and private households as best as possible during this crisis that is threatening their very existence. The following explanations give updated information and describe the key aspects of the current effects of the coronavirus pandemic on the consolidated financial statements of Oberbank AG.

#### 2) Discretionary decisions, assumptions and estimates

These consolidated financial statements contain values whose amounts were arrived at based on discretionary decisions, assumptions and estimates. These assumptions and estimates are based on past experience, budgets and forecasts regarding future events that appear likely from today's perspective.

Due to the currently unpredictable global consequences of the coronavirus pandemic, these estimates and discretionary decisions are subject to a high degree of uncertainty. The amounts actually reported may differ from the estimates and discretionary decisions. Such changes may have material effects on the consolidated financial statements. The updated estimates and discretionary decisions took into consideration all available information on the probable further development of the economy.

The updated discretionary decisions, assumptions and estimates contained in these consolidated financial statements relate essentially to the items presented below.

#### **Risk provisions**

The measurement of risk provisions depends mainly on expectations regarding future loan losses and the structure and quality of the loan portfolio. In addition, the calculation of any future charges for impairment losses requires estimates of the amounts and dates of future cash flows. Further details are given in 3) Risks of financial instruments.

#### Fair value of financial instruments

Where the fair value of financial assets and financial liabilities cannot be measured using current stock market prices, because no publicly quoted market prices are available, model values are used. The measurement models, input parameters, the fair value hierarchy and the fair values of financial instruments are described in detail in Note 31) Fair value of financial instruments and other items regarding reconciliation as at 31 March 2021.

#### Impairment losses on investments accounted for using the equity method

If there is objective evidence for impairment of an investment accounted for using the equity method, an individual valuein-use is calculated for this investment. Details regarding the effects of the coronavirus pandemic are given in 3) Risks of financial instruments.

#### 3) Risk from financial instruments

#### Effects of the coronavirus pandemic on the impairment model for financial instruments pursuant to IFRS 9

The first quarter of 2021 continued to be dominated by a recession of historic magnitude in Austria as well as in the entire region of Oberbank's markets. According to OeNB, Austria's GDP in the 12 months since the first lockdown was on average 8.5% lower than in preceding 12 months. A marked economic recovery is expected to set in as soon as vaccination coverage of the population is sufficiently high. Over the medium term, the economic outlook is encouraging before the backdrop of a robust upswing in the industrial sector. Should the lockdowns be phased out in the summer of 2021, economic recovery in Austria is expected to be strong.

Governments and central banks have responded to the crisis with massive interventions and financial aid measures. In the preceding year, for example, extensive moratoria on loan repayments were mandated by law in Austria and other countries which were still valid in Q1 2021, and in some cases, will continue until 30 June 2021. Likewise, far-reaching subsidy schemes were rolled out. The key trigger events for insolvencies among businesses such as default on payments to tax authorities and social insurance organizations are currently suspended and this is obfuscating the true impact of the coronavirus pandemic on business failures.

The decline in economic output is not reflected directly in the insolvencies of individuals and businesses due to the effects of the massive public funding schemes. The "surge" in insolvencies is generally expected to occur with a time lag. Furthermore, it is assumed that support is also being given to businesses that would otherwise default even without the coronavirus pandemic – so-called "zombie companies". It is not possible to consider these circumstances adequately in the rating models.

The Oberbank impairment model contains, among other things, a modification of the default probability (PD) to take into account forward-looking macroeconomic information. The financial aid measures help to ameliorate the negative economic effects for our customers, but also make the early detection of any potential worsening of credit quality more difficult. Therefore, the direct relationship between default rates and macroeconomic development is temporarily suspended and distorted. If one were to apply the already positive estimates for GDP growth for the year 2021 in the model, the expected default probabilities would decrease even further although the rating structure has not yet deteriorated across a broad base. The forward-looking information (FLI) model developed at Oberbank uses a time-series that does not take into account the economic distortions, government support measures or extreme macroeconomic values, and therefore, it cannot be applied to the current economic phase.

Before this backdrop, the point-in-time adjustment factors have not been adjusted since the second quarter of 2020. A collective stage transfer was carried out for certain segments of the portfolio in order to deal with the expected higher default risk. For the assessment, additional risks are identified with an influence on impairment charges, especially crisis-induced risks and those of a probably temporary nature. The collective stage transfer is applied to the following portfolios:

- Receivables from borrowers in industries severely affected by lockdowns: Based on the allocation to branches
  using the NACE code system, a structural analysis of both the supply and the demand side with respect to the
  severity of the shock is conducted and the companies are categorised according to a 5-tier scale. Based on this
  categorisation, receivables with the highest ranking regarding the severity of the economic impact of the
  lockdowns are transferred to stage 2. As a consequence, the NACE Code serves as a further qualitative criterion
  in the stage transfer model, and therefore, a lifetime expected loss is used as basis for defining impairment
  charges for all receivables of the sectors concerned (accommodations, restaurant and foodservice industry,
  travel, aerospace).
- Receivables from borrowers that are still in the status of statutory moratoria as at the reporting date: In this case, it is pointed out that in some of Oberbank's markets (Hungary, Slovakia) EBA-compliant deferrals are still possible; therefore, these loans are assigned to stage 2 provided there are not already classified as forborne. Generally, it is assumed that the necessity of a payment deferral granted on the reporting date is a further indicator of a higher default risk.
- Receivables from borrowers in the segment of real estate project finance with commercial mortgage-backed collateral: As the credit risk of these loans are directly related to the earnings opportunities from the sale or rental of real estate, any distortions on the real estate market caused by the coronavirus crisis have an effect on creditworthiness. The current focus is on the market for commercial real estate where demand is being negatively influenced by the pandemic.
- Receivables from borrowers classified as severely affected by the coronavirus based on case-by-case analyses conducted in Q1 2021 of coronavirus vulnerability of customers with high risk exposure: As a management overlay measure, a risk provision in the amount of the lifetime expected loss was allocated for these customers.

Compared with the start of the year, the amount of the impairment charges for performing loans (stage 1 and stage 2) increased by EUR 2.4 million. The effect of the collective staging additionally applied in the first quarter is EUR 5.0 million and refers to a volume of receivables of EUR 314 million.

#### Fair value measurement

The measurement models and processes, and the determination of the fair value as well as the effects of the coronavirus pandemic are described in detail in Note 31) Fair value of financial instruments and other items regarding reconciliation as at 31 March 2021.

#### Impairment testing for investments accounted for using the equity method

Interests in entities accounted for using the equity method are recognised proportionately to the equity held by Oberbank in the entity. If there is objective evidence for impairment of an investment accounted for using the equity method, an individual value-in-use is calculated for this investment. The higher of the two values – market price and value-in-use – constitute the recoverable amount pursuant to IAS 36.6 and is used for the measurement. No impairment loss was recognised as at 31 March 2021.

#### 4) Impairment losses for non-financial assets and deferred tax assets on loss carryforwards

Oberbank holds non-financial assets in intangible assets; property, plant and equipment; investment property; and rightof-use assets on leased objects. Assets are accounted for at amortised cost. There were no indications for impairment losses such as shop closures, declining demand for banking products, significant changes to right-of-use assets or the reassessment of usable life. The fair value of investment property was EUR 102,228,000 (31 Dec. 2020: EUR 105,150,000). The decline is due to depreciation over time. Currently, there are no signs of additional adjustments on the real estate market due to the effects of the coronavirus pandemic.

Oberbank AG capitalised deferred tax assets on loss carryforwards to a minor extent of around EUR 556,000 (31/12/2020: EUR 647,000). The earnings situation of the Group companies from which the loss carryforwards result did not change due to the coronavirus pandemic. The tax loss carryforwards will remain recoverable.

The relief measures issued by IASB in May 2020 regarding the application of IFRS 16 granting lessees accounting concessions in the case of, for example, lease payment deferrals and rent reductions directly related to the coronavirus pandemic, will not have any effect on Oberbank at present. Oberbank as the lessee has not made use of the options of lease payment deferrals or rent reductions.

#### 5) Presentation of effects attributed mainly to the coronavirus pandemic

The material effects of the coronavirus pandemic on the income statement referred to the item Charges for losses on loans and advances (additions to loan loss provisions in lending stage 1 and stage 2) as mentioned above. However, the additions in an amount of EUR 2,458,000 cannot be unambiguously assumed to have been caused directly by the coronavirus crisis. Furthermore, the item Other administrative expenses in an amount of EUR 178,000 include costs directly related to the coronavirus pandemic (expenses for special cleaning, purchase of cleaning and disinfecting products, and protective items, IT infrastructure, furnishings for branches). Furthermore, the coronavirus caused reduced or suspended distributions on profits from equity investments. However, the effects caused by the coronavirus cannot be precisely quantified.

#### 6) Material events since the close of the interim reporting period

No events of material significance occurred after the reporting date 31 March 2021.

Since no financial instruments with diluting effect were issued, diluted earnings per share were identical with undiluted earnings per share. In the financial year 2020, the preference shares issued were converted into ordinary shares. Therefore, earnings per share as at 31 March 2021 refer only to ordinary shares. In the same period of the preceding year, earnings per share were the same for both ordinary and preference shares.

#### 17) Lease contracts in which Oberbank is lessee

The lease contracts entered into by Oberbank relate mainly to rentals for branch premises and office space as well as to building rights and tenancy right for plots of land, garages, business equipment and furnishings, and vehicles. The leasing contracts do not involve any significant restrictions or commitments. There were no sale-and-leaseback transactions. For the first quarter of 2021 or as at 31 March 2021, the consolidated balance sheet, consolidated income statement and consolidated statement of cash flows for Oberbank as a lessee are presented below:

| Leasing in the consolidated balance sheet                          | 31/3/2021                 | 31/12/2020              |
|--|---------------------------|-------------------------|

The fair value corresponds to the amount at which an asset can be sold or a liability settled by market participants in a transaction under market conditions on the balance sheet date or at which a debt can be transferred.

The assessment of the fair value is based on the assumption that the transaction takes place either on the principal market for the respective asset or debt instrument or, if no such principal market exists, the most advantageous active market for the respective transaction, provided the entities involved have access to such markets. Where market prices are available for identical assets or debt instruments in an active market to which access is available on the balance sheet date, these prices are used for the measurement (level 1). Where no such market prices are available, the fair value is determined using valuation models based on parameters that are either directly or indirectly observable (level 2). Where the fair value cannot be assessed on the basis of market prices or using valuation models fully based on directly or indirectly observable market data, individual valuation parameters that are not observable on the market are estimated on the basis of reasonable assumptions (level 3).

All fair value measurements refer to regularly performed measurements. There were no one-off fair value measurements in the reporting period.

#### Measurement process

Responsibility for independent monitoring and communication of risks as well as the measurement of financial instruments lies with Strategic Risk Management of Oberbank. The unit is functionally and organisationally separate from trading, which is responsible for the initiation and conclusion of transactions. Trading book positions are marked-to-market daily at the close of business.

Valuation is based on current stock exchange prices where such quoted market prices are publicly available. If direct measurement based on prices quoted on securities exchanges is not possible, model values derived from current market data (yield curves, volatilities, etc.) are used. The market data is validated daily; at regular intervals, the model prices are compared with the prices actually obtainable on the market. Moreover, model prices of derivatives are compared with the model values of the partner banks. The management is sent a daily update on risk positions and the valuation results based on the entire trading book positions. The fair value of financial instruments not carried in the trading book is measured on a quarterly basis.

#### Valuation methods for measuring fair values

The valuation methods used are in compliance with recognised mathematical methods for measuring financial instruments taking into account all factors that market participants would consider appropriate for determining a price. The incomebased methodology applied is the fair value measurement approach. The market-based approach is applied in the fair value measurement of structured products.

#### Input factors for fair value measurement

The measurement of the fair value of financial instruments in **level 1** is based on prices quoted on active markets. These instruments include listed securities and derivative instruments. If direct measurement based on prices quoted on securities exchanges is not possible, the present value in level 2 is estimated using model values derived from current market data (yield curves, volatilities, etc.). Underlying interest-rate curves and volatilities are obtained from the Reuters Market Data System.

Measurements are based on generally-accepted valuation models, with measurements being made under market conditions. In the case of derivatives, symmetrical products (e.g. IRS) are measured using the discounted cash flow method. The fair values of asymmetrical products (options) are calculated using standard methods (e.g. the Black-Scholes, Hull & White, etc.). Structured products are measured on the basis of price information obtained from third parties. All derivative instruments are measured on a counterparty-risk-free basis in a first step. In a second step, a credit risk markdown is determined (credit valuation adjustment, CVA) based on the internal default probabilities of an expected loss.

The fair values of non-listed securities are obtained from the Geos system. The fair value of investment fund units is obtained from the fund management companies. The present value method (discounted cash flow method) is used to calculate the fair value of securitised liabilities, subordinated capital and amounts owed to banks and customers, with the cash flows of own issues being calculated using the contractual interest rate. The interest rates used for discounting are derived from the discount curve applicable to the respective currency, adding a premium in the form of a credit spread corresponding to the seniority of the issue. The credit rating premiums are adjusted regularly to the respective market conditions. The fair value of level 3 assets is measured using generally-accepted valuation models. The fair value measurement of receivables from banks and customers is based on the discounted contract cash flow (based on contractually-agreed repayment structures) and the discounted expected credit loss cash flows (considers the credit rating of customers and collateral). The exchange rates used are the reference rates published by the ECB. The sustained phase of low interest rates was aggravated by the coronavirus pandemic. Central banks announced that they would be keeping key lending rates unchanged for some time to come. Interest rates on capital markets are not expected to be pushed above the normal level by higher short-lived inflationary expectations. Therefore, a higher influence of the interest rate component on financial instruments measured at fair value that can be attributed to the coronavirus pandemic is not given. An economic downswing triggered by the coronavirus pandemic and the resultant potential downgrading of credit ratings of customers affects the calculation of fair values of level 3 financial instruments. If measurements based on risk premiums were to increase by 50 bp, receivables from customers valued at fair value would decline by EUR 0.5 million (31/12/2020 EUR € 0.6 million), and if risk premiums were to increase by 100 bp, the fair values of these receivables would decline by EUR 1.1 million (31/12/2020 EUR 1.2 million).

The fair value of equity investments and shares in affiliated companies is measured primarily using the discounted cash flow entity method and/or mixed methods (multiples method in combination with the discounted cash-flow method) or other methods of company valuation.

Changes in the fair value hierarchy or classification take place whenever there is a change in the quality of the input parameters used in the valuation method. Classification adjustments are made at the end of the reporting period.

The following table shows the development of equity investments FVOCI measured at fair value and assigned to level 3. The fair value of theses assets is measured primarily using the discounted cash flow entity method and/or mixed methods (multiples method in combination with the discounted cash-flow method) or other methods of company valuation.

| Movements in €k                    | Equity investments FVOCI |
|------------------------------------|--------------------------|
| Carrying value as at 1/1/2021      | 237,299                  |
| Additions (purchases)              | 0                        |
| Disposals (sales)                  | -12,744                  |
| Value changes recognised in equity | 0                        |
| Value changes recognised in income | 0                        |
| Carrying value as at 31/3/2021     | 224,555                  |

The item Other comprehensive income from these instruments increased by EUR 9,000.

The remaining level 3 financial instruments measured at fair value comprise loans and advances to customers.

|                                | Loans and advances to |
|--------------------------------|-----------------------|
| Movements in €k                | customers             |
| Carrying value as at 1/1/2021  | 50,301                |
| Transfer to level 2            | 0                     |
| Additions                      | 0                     |
| Disposals                      | -2,567                |
| Changes in fair value          | -358                  |
| thereof disposals              | -91                   |
| thereof portfolio instruments  | -267                  |
| Carrying value as at 31/3/2021 | 47,376                |

There were no transfers between Level 1 and Level 2.

#### STATEMENT BY THE MANAGEMENT BOARD PURSUANT TO §125 STOCK EXCHANGE ACT

#### The Management Board confirms that

- these condensed interim financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) and the International Accounting Standards (IAS) currently in force and published by the International Accounting Standards Board (IASB) as applicable in the EU and the interpretations thereof by the International Financial Reporting Interpretations Committee (IFRIC); they furthermore present a true and fair view of the assets, liabilities, financial position and results of operations of the Oberbank Group.
- These consolidated interim financial statements cover the first quarter of 2021 (1 January 2021 to 31 March 2021) and present a true and fair view of the assets, liabilities, financial position and profit or loss of the Oberbank Group in compliance with the principles of IFRS for interim financial reports.

# The undersigned members of the management board in their function as legal representatives of Oberbank confirm that

a) these condensed interim financial statements have been prepared in accordance with the relevant accounting standards and to the best of their knowledge present a true and fair view of the assets, liabilities, financial position and result of operations of the issuer and of all companies included in the group of consolidated companies;

b) the management report presents a true and fair view of the assets, liabilities, financial position and result of operations with respect to the key events in the first quarter of the financial year and their effects on the condensed interim financial statements, with respect to the key risks and uncertainties in the remaining months of the financial year and with respect to material business transactions with related parties that must be disclosed.

CEE as defined by Oberbank comprises the regions of Czech Republic, Slovakia and Hungary.
 Oberbank Service GmbH, 100% subsidiary of Oberbank

#### Notes

The forecasts that refer to the future development of Oberbank are estimates made on the basis of all the information available to us on the reporting data. Should the assumptions regarding such forward-looking statements prove incorrect or should risks materialise to an extent not anticipated, the actual results may vary from those currently expected. Information provided on market shares are based on the most recent data available at the copy deadline.

When adding up rounded figures and calculating percentage rates of change, slight differences may result compared with totals and rates arrived at by adding up component figures which have not been rounded.

The 'n/a' in the charts and tables means that the respective provision was not applicable in the relevant financial year.
